

# Sometimes, it's all about expectations

Sometimes in life it's not so much what you do, it's what you do relative to what the world expects of you, like Lloyd Christmas in *Dumb & Dumber*, totally redeeming himself in the eyes of Harry Dunne when he trades their van "straight up, to a kid in town" for a moped that gets 70 MPGs. The same dynamic applies to Wall Street, specifically when it concerns how corporate earnings come in relative to what investors expected. A case in point is Q2 2020 earnings season. It has been a doozy of an earnings season for the companies that make up the S&P 500 Index, with earnings off 30% year-on-year, the worst since Q1 2009, when the country was in the midst of the Great Recession. While a 30% haircut in earnings is painful, the world thought results were going to be even worse as we entered Q2 earnings season. In fact,

with 499 of the S&P 500 companies having reported quarterly earnings results, 83% have topped expectations, the highest percentage on record, dating back to 1994, and well above the long-term average of 65%. That quarterly performance relative to investors' expectations – and what it says about the disconnect between how Wall Street thought the economy was performing and how it actually was performing – are important, and legitimate, catalysts for the dramatic rally in US equities these past several months. Finally, with the S&P 500 Index up 1.41% since August 3, our Election Countdown Calculator is indicating President Trump will win reelection come November 3.

## Election countdown calculator

## Stocks, bonds, and commodities (9/11/2020)

Security name	Last	QTD chg	YTD chg	12mo chg
S&P 500	3340.97	7.76%	3.41%	11.09%
MSCI AC World ex USA	284.97	7.54%	-5.54%	0.75%

# Brinker Capital Market Barometer

SEPTEMBER 2020

We continue to focus on the COVID-19 pandemic and the upcoming election as key drivers for the economy, financial markets, and confidence over the near term. The Federal Reserve has expanded monetary policy support with the introduction of a more flexible inflation target. Fiscal policy remains supportive, and we expect an additional fiscal package will still be completed. We also expect the equity market to remain range-bound in the near term as we navigate an uneven economic recovery. Overall, the barometer leans neutral to slightly positive, in-line with our modest overweight to risk across portfolios.

SHORT-TERM FACTORS (< 6 months)					
	CHANGE	NEGATIVE	NEUTRAL	POSITIVE	
Momentum				●	Momentum remains solid
Trend				●	US markets above 50-day and 200-day moving averages
Investor sentiment			●		Sentiment surveys show optimism but equity outflows continue
Seasonality		●			Seasonality weaker through October, especially during election cycle
INTERMEDIATE-TERM FACTORS (6-36 months)					
	CHANGE	NEGATIVE	NEUTRAL	POSITIVE	
Fiscal policy				●	Very strong fiscal response; debate on additional package continues
Monetary policy				●	Fed all in to support markets and economy; Global central banks also supportive
Inflation				●	Global inflation low; Fed committed to more flexibility with inflation target
Interest rate environment				●	Treasury yields remain at low levels but stable; yield curve positively sloped
Macroeconomic			●		Macroeconomic data has bottomed; uneven improvement as economy reopens
Business sentiment		●			CEO confidence improved in 2Q but still weak; small biz optimism improving
Consumer sentiment		●			Consumer confidence declined further in July on coronavirus concerns
Corporate earnings		●			Looking for improvement after negative impact of COVID-19 on 1H results
Credit environment				●	Credit environment continues to improve and Fed remains supportive
LONG-TERM FACTORS (36+ months)					
	CHANGE	NEGATIVE	NEUTRAL	POSITIVE	
Valuation		●			Equity valuations above long-term averages but not a near-term driver
Business cycle			●		US exited recession that began in February; recovery will be uneven
Demographics			●		Mixed - US and emerging markets positive but developed international negative

MSCI AC World ex US Growth: An index made up of approximately the top 50% of the MSCI AC World ex US Index as composite ranked by five growth rates. This is a common proxy used to represent the growth segment of the developed international market. MSCI EAFE Index: A market-capitalized weighted index representing developed international equity markets located in Europe, Australia, Asia and Far East (EAFE). S&P 500 Index: An index consisting of 500 stocks chosen for market size, liquidity and industry grouping, among other factors. The S&P 500 is designed to be a leading indicator of U.S. equities and is meant to reflect the risk/return characteristics of the large-cap universe. Companies included in the Index are selected by the S&P Index Committee, a team of analysts and economists at Standard & Poor's. Barclays US Aggregate Index: A market capitalization-weighted index, maintained by Barclays Capital, and is often used to represent investment grade bonds being traded in the US. MSCI Emerging Markets: a float-adjusted market capitalization index representing 13% of global market capitalization. Captures mid and large cap across more than two dozen emerging market countries.
